

I'm concerned that changes may affect radio stations such as K-LOVE. For years, we've wanted a station like this. It is encouraging and unlike other stations in the area. If an LPFM broadcaster is used, I fear the K-LOVE would not be able to use the translator and we would use a unique station. This station is the only FM station serving the Christian community with this type of music and format.....it would be a shame to lose it.
